NEW

Crizal® PREVENCIA™

No-Glare Lenses

The first No-Glare lens on the market that deflects harmful light, providing protection for eyes.

Light scan™

PATENT
APPLICATIONS
PENDING

Crizal® Prevencia™ lenses deflect harmful Blue-Violet light by **20%.*⁴**

Crizal Prevencia has an E-SPF® value of 25, which means **25x more protection** from UV than with no lens at all.[†]

*25% less light-induced retinal cell death rate vs a naked eye, with a 20% cut of Blue-Violet light. In *in vitro* experiments conducted by Essilor and Paris Vision Institute, retinal pigment epithelium cells were exposed to Blue-Violet light, reproducing the physiological exposure to sunlight of the 40-year-old eye.

[†]E-SPF of 25 means the wearer is 25 times more protected than without any lens. E-SPF of 25 when Crizal is made with any lens material other than clear 1.5 plastic.

1. Taylor HR, West S, Munoz B, Bressler SB, et al. The long-term effects of visible light on the eye. *Arch Ophthalmol.* 1992;110:99-104 [FN 51]. 2. Fletcher AE, Bentham GC, Agnew M, et al. Sunlight exposure, antioxidants, and age-related macular degeneration. *Arch Ophthalmol.* 2008;126:1396-1403 [FN 54]. 3. Ishikawa H, Onodera A, Asakawa K, Nakadomari S, Shimizu K. Effects of selective-wavelength block filters on pupillary light reflex under red and blue light stimuli. *Jpn J Ophthalmol.* 2012;56(2):181-6 [FN 82]. 4. Arnault E, Barrau C, Nanteau C, et al. Characterization of the blue light toxicity spectrum on A2E-loaded RPE cells in sunlight normalized conditions. Poster presented at: Association for Research and Vision in Ophthalmology Annual Meeting; JUNE 5-9, 2013; Seattle, WA.

Essilor Crizal® Prevencia™ lenses are Class I medical devices intended for the correction of ametropias and presbyopia and offering selective protection from harmful blue light and UV rays. Essilor informs you that the above information is general information given as prevention and public awareness. For more information, Essilor invites you to consult a healthcare professional (eye doctor, ophthalmologist).

Covered under U.S. Patent No. 8,360,574. Additional U.S. and foreign patents pending.

E-SPF is a global index developed by Essilor, endorsed by independent third parties, measuring the lens' UV protection excluding direct eye exposure from around the lens. E-SPF of 25 means the wearer is 25 times more protected than without any lens. E-SPF of 25 when Crizal Prevencia is made with any lens material other than clear 1.5 plastic.
